

Upgrade Planning Service Extended to All DDN Products

Support Tiger Team Provides Change Management Services for All DDN Hardware, Firmware, and Software

Given the many dependencies involved in DDN storage array hardware upgrades, firmware changes, and software solution updates, DDN's Vice President of Technical Sales, Services, and Support, Mark Canepa, has expanded the role of DDN Support's Upgrade Tiger Team to assist with upgrade planning and change management across the entire DDN product line. This initiative builds on last year's success with the SFA10K Upgrade Tiger Team.

All hardware products currently supported by DDN are covered by this initiative. This includes the S2A9900, S2A6620, SFA7700, GS7K, ES7K, SFA10K, SFA12K, SFA14K, WOS6000, WOS7000, and WOS9660 storage array families, as well as the SS6000, SS7000, SS8460, and SS8462 drive enclosures. Storage array operating system firmware such as SFA OS and S2A DirectOS, as well as low-level firmware updates for components, are included.

All software products currently supported by DDN are covered as well. These include EXAScaler, GRIDScaler, MEDIAScaler, WOS Core, WOS Access (all APIs and protocols), and DirectMon.

All DDN customers with products covered by a support contract may engage the Upgrade Tiger Team for upgrade planning and change management services at **no extra charge**.

Engaging the Upgrade Tiger Team

Engaging the Upgrade Tiger Team is as easy as opening a DDN Support case. Just follow these steps.

- **Open a DDN support case** and request assistance from the Upgrade Tiger Team. Describe the equipment and software involved in your upgrade project and the nature of the desired hardware, software, or firmware change. The DDN Support engineer working the case will engage the Tiger Team for log review, validations, and migration path recommendations.

To open a case, please email support@ddn.com, log in to the [DDN Community Support Portal](#), or call:

North America +1.888.634.2374
Europe, Middle East, & Africa +800.3282.3473
Japan +81.3.4579.0253
Other international +1.818.718.8507

- **Please collect system logs** from each controller and DDN-supplied file system or software product in the storage system(s) to be upgraded **prior** to taking any action. Attach these logs to the support case for review by the Upgrade Tiger Team. The following logs are needed:

S2A showall
SFA (includes S2A6620) show sub sum, show sub sum all (both required)
WOS
CLI curl -u admin:admin http://172.26.5.121:8088/mgmt/scrape
GUI http://172.26.5.121:8088/mgmt/scrape in browser address field,
then look for ddn_support.tgz file in **Downloads** section of **Maintenance**
page. Refresh screen using Ctrl-r if file does not appear in list.
WOS Access CIFS/NFS /opt/ddn/nas/share/config/bug_report.sh
(for wos1a at 172.26.5.121 and wos2a at 172.26.5.124)
WOS Access S3/Swift Contact DDN Support for assistance.
EXAScaler es_showall
GRIDScaler gs_showall (or gsctl showall for version 3.2 or higher)
GRIDScaler WOS Bridge ... g2w_showall
(for wos-1 at 172.26.5.125 and wos-2 at 172.26.5.126)
MEDIAScaler Contact DDN Support for assistance.

- **A DDN Support engineer will be assigned to manage your upgrade case** from beginning to end. Your engineer will work with the Tiger Team to create your Action Plan. If you have questions at any time, the engineer working your case is the person to contact. If you wish to escalate your case to management, simply notify your support engineer, who will engage a manager to assist you.
- **The Tiger Team will prepare an Action Plan** for your upgrade project. The Action Plan will itemize the steps to be taken to ensure a smooth upgrade. The plan will also provide scheduling guidance for sizing the required maintenance window.

IMPORTANT! Please do not schedule a maintenance window until you have received your Action Plan. The scheduling guidance provided by the plan may require a larger maintenance window than you might initially anticipate.

- **Please allow at least three weeks (15 U.S. business days)** from the date logs were provided to receive your Action Plan. Action Plans for Severity 1 emergencies and DDN-designated mandatory

upgrades are prioritized first. For routine maintenance upgrades, Action Plans are prioritized based on the level of support purchased.

- **Your DDN Support engineer will provide telephone support** during execution of the Action Plan.

Our goal is to ensure a satisfactory upgrade experience for all DDN customers.

Contacting DDN Technical Support

Please contact DDN Technical Support at any time if you have questions or require assistance. Support can be reached by phone, by email, or on the web as listed below.
