**ICR** The Institute of  
Cancer Research

“DDN’s innovative design for storage tiering was the winning combination because it gave us the most flexibility to adapt to changing research needs.”

**Dr. Jon Lockley**

Head of Scientific Computing, The  
Institute of Cancer Research, London

## Easily Accessible Data for Analysis and Big Data Modeling

Taking storage to the next level by adapting support services to meet needs of 140 research teams focused on the future of dynamic adaptive therapies.

### Customer Needs

- A single, central storage infrastructure
- Enable users to collect and analyze all types of active research data

### Results

- An inherently agile solution that could expand quickly and transparently.
- Extremely resilient infrastructure with replication and erasure coding across three geographically separate locations.
- Collected data is easily accessible for analysis and big data modeling.

#### Performance

Clinicians want fast results from diagnostic tests and treatments

#### Flexibility

Supporting a variety of data workflows and delivery needs

#### Scale

A solution that could grow over time and keep pace with

#### Experience

Looking for a trusted partner with a solution that could evolve over time

### About DDN

DataDirect Networks (DDN) is the world’s leading big data storage supplier to data-intensive, global organizations. DDN has designed, developed, deployed, and optimized systems, software, and solutions that enable enterprises, service providers, research facilities, and government agencies to generate more value and to accelerate time to insight from their data and information, on premise and in the cloud.
