

DDN Collect Tool version 1.6 was released on March 26th, 2021.

Fixes in this release:

- * Add support for multiple SFA systems
- * Add command-line option overrides
- * Update API client to 11.8.2
- * Many minor bugfixes

Installation and Upgrade:

PLEASE NOTE: If you are upgrading to this version from a prior version, It is recommended to delete the previous installation prior to installing this version. SFA API client version 11.8.2 is the recommended API version.

If you'd like to keep your existing ddntools.conf file, you must rename the [Controllers] section to [SFA0] prior to execution.
