

## DDN REACH Regulation on SVHC

Sep 4th, 2014

DDN has stringent design standards in place that prohibit and/or restrict the use of Substances of High Value Concern (SVHC), as prescribed under Article 59(10) of the REACH Regulation, in our products.

DDN is committed to using environmentally-friendly alternatives to identified hazardous/SVHC substances in applications where we have been able to identify suitable alternatives that in our estimation provide equivalent performance, for use in our products. Based on DDN's records and information from 3rd parties, we believe DDN products comply with Article 59(10) of the REACH Regulation. If required, we will provide the template as per the requirements of Article 33.

If you have any questions, please feel free to reach out to us at '[ddnsrc@ddn.com](mailto:ddnsrc@ddn.com)'.
