Web Object Scaler (WOS™) is an object storage platform that enables organizations to build scale-out storage clouds. The training class explores the WOS capability of storing data as objects with an object ID and metadata in a flat namespace. WOS Core is a central focus for the course with modules including: Theory of Operation, Administration, Monitoring, Maintenance and Troubleshooting. The WOS Amazon Web Services S3 compliant protocol is also covered in the course as well as the WOS Bridge to DDN GRIDScaler product. Extensive hands on labs will allow you to try out the lecture material in a WOS environment.

### DAY 1 AGENDA
- DDN Products Overview
- WOS Core Theory of Operation
- WOS Core Administration
- WOS Core Monitoring
- WOS Core Maintenance
- Hands on Labs

### DAY 2 AGENDA
- WOS Core Troubleshooting
- WOS S3 Software
- WOS S3 Monitoring
- Hands on Labs

### DAY 3 AGENDA
- WOS S3 Performance
- WOS S3 Troubleshooting
- Hands on Labs
- WOS Bridge
- WOS Bridge Demo

### COURSE ELEMENTS
- 3 days of face to face or 5 days remote instruction from a DDN storage professional. (Private training at customer location or remote for up to 12 students is available).
- PDF of class material provided prior to first day via download site.
- Pads and pens supplied for class notes.
- Optional multiple choice quiz administered on last day of course.
- Certificate of Completion provided if the quiz is completed with 75% or better score.

### PREREQUISITES
- Administering UNIX, Linux or Spectrum Scale based operating systems and networks is essential to maximize value of this class.
- Experience with storage array is highly recommended.
