

# GRIDScaler™

## Integration of WOS Bridge and GRID-NAS with Base Product Package [CORRECTION]

### Product Packaging Change

Effective with the GRIDScaler 3.2.0 release, GRIDScaler now integrates GRIDScaler Bridge (formerly known as WOS Bridge) and GRID-NAS (formerly known as NAS Access and CIFS NFS Gateway) with the base GRIDScaler product package. GRIDScaler Bridge provides interoperability with DDN's WOS products for archive applications. GRID-NAS provides NFS, CIFS, and SMB interoperability.

GRIDScaler Bridge and GRID-NAS are optional GRIDScaler features offered for an additional charge. (An earlier version of this bulletin stated that GRIDScaler Bridge was available at no extra charge, but *that is incorrect*. We regret the error.)

The GRIDScaler Bridge and GRID-NAS features of GRIDScaler continue to receive their own version numbers. These versions may not always change with each release of the base GRIDScaler product. The table below lists feature versions distributed with each recent GRIDScaler release.

GRIDSCALER	GRIDSCALER BRIDGE (WOS)	GRID-NAS (CIFS, NFS)
3.2.0	1.7.0	1.5.0
3.2.1	1.7.1	1.5.0
