

# DDN On-Demand Virtual Classroom

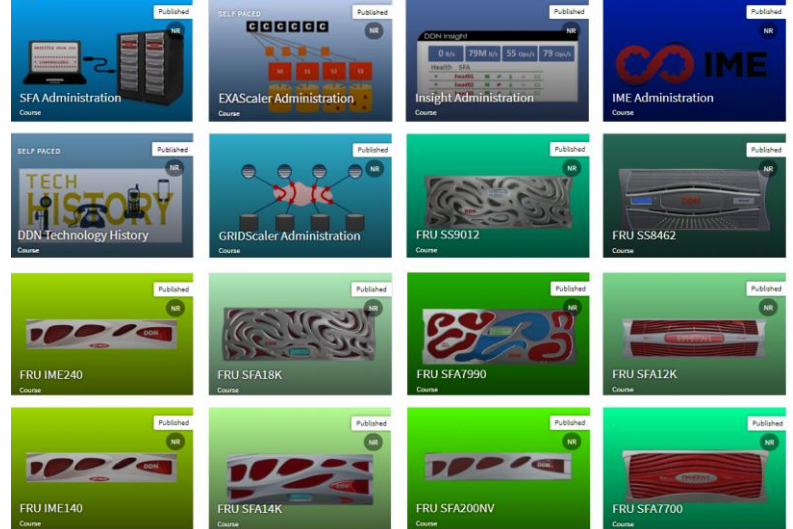

DDN now offers low cost, self-serve online training for all our major products available whenever you are ready to learn more about your system. Choose from a wide variety of content: recorded lectures, demonstrations, labs, equipment replacement procedures, quizzes and completion certificates.

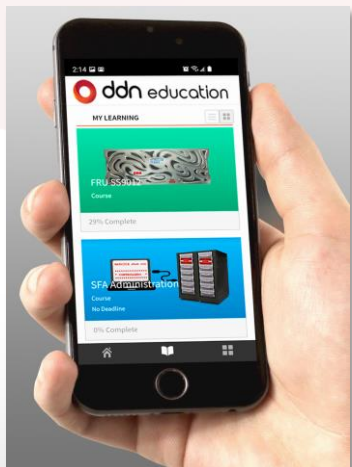

The DDN Virtual Classroom contains 60 hours of on-demand videos of training lectures and labs given by experienced DDN system and support engineers. Topics covered include: system architecture, terminology, SFA operating system, administration procedures, troubleshooting, log file interpretation, performance tuning, command line user interface and graphical user interface.

- Recorded sessions of instructor led classes: SFA, EXAScaler, GRIDScaler, IME and Insight
- Field Replacement Unit videos for all major hardware platforms e.g. SFA18K, SFA7990, SS9012
- Demonstrations and Lab Procedure recordings
- Course quizzes with completion certificates
- Over 60 hours of content and growing

## ddn Virtual Classroom Courses

**TRG-ONDEMAND**  
\$995.00 for single user 12 month access

Training can be viewed on any desktop, laptop or portable device. Learn about DDN products anytime and anywhere. The system tracks your progress so if you get interrupted, you can resume the course where you left off. Once you pass the quiz, you can print a certificate of completion for the course.

Contact your DDN sales representative for more information on purchasing access to all the customer content on the DDN Virtual Classroom for the low annual cost of \$995 per user.
